

Cats and cancer

Kittens can contract Feline Leukemia Virus by drinking their mother's milk if she is infected. Older cats can get infected by coming in contact with infected saliva or blood.

"Paws" for these healthy facts about dogs and cats.

You're how old?

An adult cat ages 4 years for every 1 year that humans age. That means visiting your veterinarian every 3 years is like waiting 12 years for a cat!

Don't forget about the cat

Many people don't realize that cats can get heartworm disease too!

Pearly whites

Healthy teeth and gums are more important than you think. Dental issues can signal that your cat has a serious chronic issue like kidney disease.

A lifetime of good health

Puppies, young, and older dogs all need regular vaccinations to stay strong and healthy. Routine visits to your veterinarian will help your dog get the right vaccinations for their lifestyle.

More than usual

Dogs can get diabetes too! The most common signs of diabetes in dogs are excessive thirst, excessive hunger, and excessive urination.

Sharing is not always caring

Parasites like hookworms and roundworms can transmit zoonotic diseases. A zoonotic disease is one that can affect multiple species like dogs and humans.

A bite out of Lyme

90% of Lyme-positive animals will show no clinical signs of the disease.
